

# TABLE OF CONTENTS

## Chapter 1 RETROFIT BY CFR SHEETS

1.1	Introduction .....	1
1.2	Characteristics.....	1
1.2.2	Materials .....	2
1.2.2	Construction method .....	4
1.3	Materials.....	5
1.3.1	Types and characteristics of fibers .....	6
1.3.2	Types and characteristics of continuous fiber sheets .....	7
1.3.3	Characteristics of the FRP sheets .....	8
1.4	Construction methods.....	9
1.4.1	Overview .....	9
1.4.2	Area of application and objective .....	11
1.4.3	Characteristics .....	12
1.5	Past and present researches.....	13
1.5.1	Strengthening of columns in civil structures .....	13
1.5.2	Strengthening of columns in buildings .....	25
1.5.3	Reinforcement of beams and floors .....	35
1.5.4	Other research work .....	39
1.6	Evaluation methods.....	45
1.6.1	The design method.....	45
1.6.2	The construction method of continuous fiber sheets.....	49
1.6.3	Testing method .....	50
1.7	Points to note in design .....	53
1.7.1	Flexural strengthening.....	53
1.7.2	Shear strengthening and ductility enhancement.....	56
1.7.3	When the finish is not to be removed.....	66
1.7.4	Round bar used for longitudinal reinforcement .....	70
1.8	Field applications .....	73
1.8.1	Introduction .....	73
1.8.2	Applications before 1997 .....	74
1.8.3	Applications since 1997 .....	79
1.9	Subjects to be considered in the future.....	83
1.9.1	Higher performance and lower price of materials.....	83
1.9.2	Refinement of quality and performance evaluation method of reinforcing members .....	83
1.9.3	Improvement of construction method and enhancement of construction management method .....	83
1.9.4	Confirmation of impacts on social environment.....	85
1.9.5	Training of technicians .....	85

## Chapter 2 TEST METHOD

2.1	Test method for tensile properties of continuous fiber reinforcing materials (draft).....	86
2.1.1	Scope.....	86
2.1.2	Definitions .....	86
2.1.3	Test pieces .....	86
2.1.4	Testing machine and devices .....	87
2.1.5	Test temperature .....	87
2.1.6	Test method .....	87
2.1.7	Calculation and expression of test results .....	88
2.1.8	Test report .....	89
2.2	Test method for flexural tensile properties of continuous fiber reinforced materials (draft) ....	89
2.2.3	Scope.....	89
2.2.2	Definitions .....	89

2.2.3	Test pieces .....	89
2.2.4	Testing machine and devices .....	90
2.2.5	Test temperature .....	90
2.2.6	Test method .....	90
2.2.7	Calculation and expression of test results .....	91
2.2.8	Test report .....	91
2.3	Test method for tensile properties at bent section of continuous fiber reinforcing materials (draft) .....	91
2.3.1	Scope .....	91
2.3.2	Definitions .....	92
2.3.3	Test pieces .....	92
2.3.4	Testing machine and devices .....	92
2.3.5	Test temperature .....	92
2.3.6	Test method .....	93
2.3.7	Calculation and expression of test results .....	93
2.3.8	Test report .....	93
2.4	Test method for creep failure of continuous fiber reinforcing materials (draft).....	94
2.4.1	Scope .....	94
2.4.2	Definitions .....	94
2.4.3	Test pieces .....	94
2.4.4	Testing machine and devices .....	94
2.4.5	Test temperature .....	95
2.4.6	Tensile capacity .....	95
2.4.7	Test method .....	95
2.4.8	Calculation and expression of test results .....	95
2.4.9	Test report .....	96
2.5	Test method for long-term relaxation of continuous fiber reinforcing materials (draft).....	97
2.5.1	Scope .....	97
2.5.2	Definitions .....	97
2.5.3	Test pieces .....	97
2.5.4	Testing machine and devices .....	97
2.5.5	Test temperature .....	98
2.5.6	Test method .....	98
2.5.7	Calculation and expression of test results .....	99
2.5.8	Test report .....	99
2.6	Test method for high cycle tensile fatigue of continuous fiber reinforcing materials (draft)..	100
2.6.1	Scope .....	100
2.6.2	Definitions .....	100
2.6.3	Test pieces .....	100
2.6.4	Testing machine and devices .....	101
2.6.5	Test temperature .....	101
2.6.6	Test method .....	101
2.6.7	Calculation and expression of test results .....	102
2.6.8	Test report .....	102
2.7	Test method for coefficient of thermal expansion of continuous fiber reinforcing materials by thermo-mechanical analysis (draft) .....	102
2.7.1	Scope .....	103
2.7.2	Definitions .....	103
2.7.3	Test pieces .....	103
2.7.4	Testing machine and devices .....	103
2.7.5	Test temperature .....	104
2.7.6	Test method .....	104
2.7.7	Calculation and expression of test results .....	104
2.7.8	Test report .....	104
2.8	Test method for alkali resistance of continuous fiber reinforcing materials (draft).....	105
2.8.1	Scope .....	105
2.8.2	Test pieces .....	105
2.8.3	Immersion in alkaline solution .....	106

2.8.4	External appearance and mass change .....	106
2.8.5	Tensile test.....	106
2.8.6	Calculation and expression of test results .....	107
2.8.7	Test report .....	107
2.9	Test method for bond of continuous fiber reinforcing materials by pull-out testing (draft) .....	108
2.9.1	Scope.....	108
2.9.2	Definitions.....	108
2.9.3	Test pieces .....	108
2.9.4	Testing machine and devices.....	109
2.9.5	Test method .....	109
2.9.6	Calculation and expression of test results .....	110
2.9.7	Test report .....	110
2.10	Test method for tensile properties of continuous fiber sheet (draft).....	111
2.10.1	Scope.....	111
2.10.2	Definitions.....	112
2.10.3	Test pieces .....	112
2.10.4	Testing machine and measuring instrument .....	113
2.10.5	Test temperature .....	113
2.10.6	Test method .....	113
2.10.7	Arrangement of test result .....	114
2.10.8	Test report .....	115
2.10.9	Commentary .....	115
2.11	Test method for bond between continuous fiber sheet and concrete (draft).....	116
2.11.1	Scope.....	116
2.11.2	Definitions.....	116
2.11.3	Specimens.....	116
2.11.4	Testing machine and devices.....	117
2.11.5	Test method .....	118
2.11.6	Calculation and expression of test results .....	118
2.11.7	Test report .....	119
2.11.8	Commentary .....	120

### **Chapter 3 LIFECYCLE ASSESSMENT**

3.1	Introduction .....	117
3.1.1	Background of the research .....	117
3.1.2	Comprehensive assessment system of structures .....	117
3.1.3	Weight of assessment components .....	118
3.1.4	Outline of the research .....	119
3.2	Analysis of characteristics of CFR concrete structures.....	119
3.2.1	Assessment components through life cycle of structures.....	119
3.2.2	Assessment of actual structures .....	119
3.3	Comprehensive assessment of CFR concrete structures .....	131
3.3.1	Weight of each assessment component .....	131
3.3.2	Potential point and weight of each assessment component.....	138
3.4	Summary and conclusion .....	142
